

AUTO DIALER

If any theft or a fire accident or any other unforeseen incident were to take place at your home or office, irrespective of whether you were home or at work, would it not be helpful if some one were to call your friends, relatives, the police and the fire station, one after the other, and convey a message that such a thing is happening at your premises and that their immediate help is required and, if any of these numbers were to be busy, try the same again, in turns. The Auto Dialer – AD33 does just that. Include your mobile phone number in the prescribed list and you could reach home/office immediately and check whatever it is that's going wrong.

AD-33 dials to telephones and sends pre-recorded messages in the event of burglary, fire.
